Professional Profile

Professional Profile Fullstack Developer with a degree in software engineering, proficient in both front-end and back-end development for web and mobile applications. Experienced with Laravel on the server side and React.js on the client side, I design high-performance, MVC-structured applications. Comfortable with MongoDB, MySQL, and API integration, I am eager to apply my skills to ambitious and scalable projects. I focus on security, documentation, and clean, testable code using Sanctum for API authentication and role-based access.

Work Experience

Web/Mobile Developer Intern, 03/2024 - 06/2024

Ma Petite Robe En Wax - Dakar - Apprenticeship Contract

- Developed and deployed the company's website, enhancing online visibility using HTML, CSS, Bootstrap, and JavaScript.
- Completely redesigned the Ma Petite Robe En Wax application with Flutter, optimizing performance.
- Created and integrated RESTful APIs with Laravel, facilitating communication between the mobile application and web services.

Projects

E-ticket – Online Ticketing SaaS (2025): Laravel (API + Sanctum), React.js, MySQL, QR Code, Notifications

- Developed a complete SaaS ticketing system with multi-role architecture (admin, organizer, user)
- Built secure RESTful APIs with Laravel and Sanctum for events, ticket categories, purchases, and dashboard statistics
- Integrated advanced features: QR code generation, file uploads (avatar, ID), real-time ticket statistics and revenue tracking
- Implemented MVC architecture, token-based authentication, middleware protections, and form request validation
- Created and integrated RESTful APIs with Laravel, facilitating communication between the mobile application and web services.

Ma Petite Robe En Wax – Mobile Co-creation Platform (2024): Laravel (API), Flutter, MySQL, Three.js

- Designed and implemented a Laravel backend to power a fashion customization app
- Created API endpoints for user roles, orders, payments, and a 3D clothing configurator
- Built admin dashboard and integrated artisan-client collaboration flow with secure payment logic
- Applied MVC structure and Sanctum authentication for all API interactions

Education

Master's Degree: Software Engineering, 02/2025 - Ongoing
GOMYCODE - Online

Bachelor's Degree: Software Engineering, 12/2021 - 12/2024
Institut Supérieur d'Informatique - Dakar
GPA: Graduated with High Distinction

Skills

- | | |
|---------------------------------|-------------------------|
| ✧ HTML/CSS | ✧ Git, Github |
| ✧ Bootstrap, Tailwind | ✧ Jenkins, Docker, AWS |
| ✧ Figma | ✧ MVC Architecture |
| ✧ JavaScript, React.js, Flutter | ✧ Secure Authentication |
| ✧ Node.js, Laravel, | ✧ Curiosity |
| ✧ API RESTful | ✧ Autonomy |
| ✧ MySQL, ORACLE, MONGODB | ✧ Team spirit |
