SYLVESTRE IBOMBO GAKOSSO

Fullstack Developer

Dakar • +221 77 849 63 48 • ibombogakossosylvestre@gmail.com • [Linkedin](#) • [GithHub](#)

Professional Profile

Fullstack Developer with a degree in software engineering, proficient in both front-end and back-end development for web and mobile applications. Experienced with Laravel on the server side and React.js on the client side, I design high-performance, MVC-structured applications. Comfortable with MongoDB, MySQL, and API integration, I am eager to apply my skills to ambitious and scalable projects. I focus on security, documentation, and clean, testable code using Sanctum for API authentication and role-based access.

Work Experience

Web/Mobile Developer Intern, 03/2024 - 06/2024
Ma Petite Robe En Wax - Dakar - Apprenticeship Contract

- Developed and deployed the company's website, enhancing online visibility using HTML, CSS, Bootstrap, and JavaScript.
- Completely redesigned the Ma Petite Robe En Wax application with Flutter, optimizing performance.
- Created and integrated RESTful APIs with Laravel, facilitating communication between the mobile application and web services.

Education

Master's Degree: Software Engineering, 02/2025 - Ongoing
GOMYCODE - Online

Bachelor's Degree: Software Engineering, 12/2021 - 12/2024
Institut Supérieur d'Informatique - Dakar
GPA: Graduated with High Distinction

Skills

- HTML/CSS
- Bootstrap, Tailwind
- Figma
- JavaScript, React.js, Flutter
- LARAVEL, Node.js
- API RESTful
- MySQL, ORACLE, MONGODB

- Git, Github
- Jenkins, Docker, AWS
- MVC Architecture
- Secure Authentication
- Curiosity
- Autonomy
- Team spirit

Languages

Français: Native Speaker

Anglais: Professional (C1)

Projects

E-ticket – Online Ticketing SaaS (2025): Laravel (API + Sanctum), React.js, MySQL, QR Code, Notifications, Cinetpay
- Developed a complete SaaS ticketing system with a multi-role architecture (admin, organizer, user).
- Built secure RESTful APIs with Laravel and Sanctum for events, ticket categories, purchases, and dashboard statistics.
- Integrated advanced features: QR code generation, file uploads (avatar, ID), real-time ticket statistics, and revenue tracking.
- Implemented MVC architecture, token-based authentication, middleware protections, and form request validation

Ma Petite Robe En Wax – Mobile Co-creation Platform (2024): Laravel (API), Flutter, MySQL, Three.js, Paytech
- Designed and implemented a Laravel backend to power a fashion customization app
- Applied MVC structure and Sanctum authentication for all API interactions.
- Created API endpoints for user roles, orders, payments, and a 3D clothing configurator
- Built an admin dashboard and integrated an artisan-client collaboration flow with secure payment logic.
